Re: Kodak Alaris Scanners and ISO 9296 & ISO 7779

To whom it may concern,

In my capacity as the Company's Authorised Representative in the EU for Equipment Conformity, I confirm that all Kodak Alaris Scanners have been tested for acoustical noise sound pressures in accordance with ECMA Standard 74 which is equivalent to ISO 7779. The measurements provided in dB(A) in our technical documentation are declared to ISO 9296 for operating and standby modes.

If you have any questions please contact the undersigned,

Dr Greg Batts
EAMER & APR HSE & Sustainability Manager
Kodak Alaris Limited
